

Foretrack

Unleash the power of telematics – Web-based GPS vehicle tracking and web based fleet management provide you with round the clock visibility and control of your mobile workforce.

The Foretrack online system and associated products deliver outstanding quality and value. Our growing reputation for high quality service and rapidly expanding customer base serve testament to this. We add further value through our insight and experience, whether that be through devices, installations, data analysis or system integration – ensuring you're in the best hands possible.

Our customers need to mitigate against business risk, whether that be road incidents, incorrect routing or failed deliveries. Our systems give you the control you need to monitor and action corrective measures to benefit your business as a whole.

Do you know where your drivers are right now?

Could your fuel bills be reduced?

Would you like to turn off vehicles remotely to guard against theft?

Can you prove to your customer when your vehicles have arrived?

Do you want to reduce incidents?

Do you want to reduce vehicle wear and tear?

Could you increase the number of jobs completed each day?

Are you allocating the most appropriate vehicle to each job?

Would you like to monitor driver behaviour?

Is reducing CO2 emissions important to your business?

We provide solutions for all of the above and work with you to generate reports bespoke to your requirements.

“

The implementation of the Foretrack solution has proved to be both cost effective and extremely simple to use. We can now monitor driver behaviour and have our own bespoke reports - it really has put us back in control!

In Partnership

Foretrack is also offered to you through our extensive dealer network, ensuring that you get the local customer service you both deserve and expect. Our dealers are comprehensively trained to ensure that your queries are handled quickly and effectively. The dealers are supported via the dedicated Foretrack customer service and technical team based in Southampton.

Foretrack is a fully integrated service provider, importantly, we have complete control over the development of the system you are investing in. This means that you have direct access (through the dealer channel) to the provider and will benefit from our constant innovations.

We believe in a partnership approach and not a quick sale, we aim to manage your account and ensure you get the most from the Foretrack system.
